## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1) Applicant's election of invention I, drawn on claims 1-10, and species of shown in Figure 1, in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 11-20, are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2) Claims 1-10, are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi (EP 0972 873 A1) in view of Fleissner (5,960,525). Takeuchi discloses a wet process for manufacturing nonwoven fabric (Abstract). In the process, raw material in a solution is supplied from headbox 3 onto an endless wire 2 forming a web W on the outer surface of the wire. Water jets 5 are applied to the formed web on the outer peripheral surface of the wire. Takeuchi also discloses that following the water jets

application from the outer peripheral surface, water jets 5b may be applied onto the web from the inner peripheral surface where jets 5b are opposite roll 5c. The formed web is conveyed on wire 7 and then transferred onto wire 11 where it is put onto drying drum 13 (Takeuchi, col. 5, line 55 to col. 8, line 8, col. 12, lines 6-17, and Figures 1, 2, and 7). Takeuchi fails to disclose that the roll 5c has a patterned surface. Fleissner discloses a needling drum 2, having a plurality of openings over which a web travels on wire 3, and onto which water is jetting from beams 15, 16, under vacuum 8, causing a plurality of openings in the web over a pattern (Fleissner, col. 3, lines 4-67). It would have been obvious, to one skilled in the art at the time the invention was made, to combine the teachings of Takeuchi and Fleissner, because such a combination would create a patterned product having hole openings, thus a more marketable product of the design of Takeuchi.
